- MS – Powerpoint

PROJECTS

PROJECT – 1:

Title: Threads Together

Description: This project is about helping the people who are unable to go out by buying their basic needs. In that situations people can

open our app and find the people who are near to them and ask them for bringing the product for them and they will pay a certain amount for the product to be brought

PROJECT LINK:

<https://github.com/SaiSahithPolimera/ThreadsTogether>

PROJECT – 2:

Title: EcoEcessence

Description: EcoEssence is a web-based platform designed to promote and sell organic food products, providing users with a seamless online shopping experience. Built using HTML, CSS, and JavaScript, the front-end offers a clean and intuitive interface that highlights the importance of organic living. The back-end is powered by Node.js and Express, ensuring fast and efficient server-side operations. MongoDB serves as the database, securely storing product information, user data, and transaction records. This project showcases our ability to integrate various technologies to create a dynamic and user-friendly e-commerce website.

DEPLOY LINK:

<https://ecoessence.netlify.app>

PROJECT – 3:

Title: Sales & Customer Dashboard

Description: This dashboard provides key insights into sales performance and customer behaviour, helping businesses make data-driven decisions. I used advanced data visualization techniques to create a user-friendly interface that highlights trends, KPIs, and more.
