Career Objective

To leverage my skills in app development, data analysis, and full stack web development to create innovative and userfriendly applications, deliver actionable insights from data, and build efficient web solutions. Seeking to contribute to a dynamic team by enhancing user experiences, driving strategic decisions, and developing scalable systems.

Education

ANIL NEERUKONDA INSTITUTE OF TECHNOLOGY AND SCI-ENCES *November 2022 – May 2026*

B. Tech in CSE(AI&ML)

- GPA: 8.9/10.0

SASI JUNIOR COLLEGE

June 2020 – June 2022

Intermediate in MPC

- MARKS: 953/1000

Experience

Full Stack Web Developer

May 2024 – June 2024

Edumoon

- As a MERN Stack Full Stack Web Developer Intern, developed responsive web applications using React, Node.js, Express, and MongoDB. Created and integrated RESTful APIs, optimized performance, and collaborated with cross-functional teams to enhance features and ensure robust code quality.

Projects

Threads Together App

[GitHub](#) 

- Developed an Android application using Java, XML, and Firebase that enables users to request product deliveries from people within a 3kms radius, aimed at assisting the elderly and hospitalized individuals.

Human Resource Dashboard

[tableau](#) 

- Created an interactive Human Resource Dashboard using Tableau to visualize key HR metrics such as employee distribution, attrition rate, department-wise performance, and hiring trends for effective workforce analysis and decision-making.

Ecoessence

[GitHub](#) 

- Developed EcoEssence, a dynamic organic food store website using HTML, CSS, JavaScript, Node.js, Express, and MongoDB. Implemented features like product listings, user authentication, and cart management for a seamless shopping experience.

Registration App using Flutter

[GitHub](#) 

- Built a user registration app using Flutter with Firebase integration. Enabled image uploads to Firebase Storage along with user data for efficient profile management.

Movie Recommendation System

[Deploy Link](#) 

- Developed a movie recommendation system using Machine Learning with a Logistic Regression model, achieving 96% accuracy. Deployed the application using Streamlit for an interactive user experience

Technologies
