Karri Sai Krishna Naga Satish Reddy Leetcode Tableau Portfolio

Professional Summary

Software Developer with professional experience in backend development, RESTful API development, database management, and application development. Proficient in Go, Java, Python, JavaScript, and SQL, with hands-on experience in building software solutions, integrating APIs, debugging, and testing. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and software engineering principles.

Technical Skills

Programming Languages: Go, Python, Java, JavaScript, SQL

Software Development: Backend Development, Full Stack Development, RESTful APIs, API Integration, JSON, Debugging, Software Testing

Web Technologies: React.js, Node.js, Express.js, HTML, CSS

Databases: PostgreSQL, MongoDB, MySQL, SQL Querying, Database Design

AI & Machine Learning: Machine Learning, Computer Vision, Generative AI, LLMs, AI Agents, Model Evaluation

Tools & Technologies: Git, GitHub, GitHub Actions, Postman, DBeaver, Streamlit, Tableau, Splunk

Experience

Associate Developer *Digno Solutions* *July 2026 - Present*

- Developed and maintained **backend services and REST APIs using Go (Golang)**, implementing business logic and scalable API workflows.
- Built, tested, and debugged APIs using **Postman**, while performing database queries, validation, and data analysis using **SQL and DBeaver**.
- Investigated and resolved backend issues, collaborated with the development team on feature enhancements, and followed **Git-based development and API testing practices**.

Full Stack Web Developer *Edumoon* *May 2024 – June 2024*

- **Developed and deployed responsive and dynamic web applications** using the MERN stack (React, Node.js, Express, MongoDB), resulting in a 25% improvement in user experience.
- **Designed and integrated robust RESTful APIs** while **optimizing application performance**.
- **Completed a hands-on internship** by contributing to real-world projects.

Projects

Agentic Tree Data Structure Visualizer *Link*

- Developed an **AI-powered tree data structure visualizer** that enables users to interactively create, modify, and understand tree-based data structures through an intuitive interface.
- Integrated **AI agents and LLM-powered workflows** to provide intelligent explanations of tree operations, guide users through algorithms, and generate contextual insights based on their interactions.
- Implemented core **data structure operations and agentic workflows**, enabling automated reasoning, step-by-step explanations, and interactive visualization of algorithms while maintaining a modular and extensible architecture.

ML-Based Intelligent Traffic Signal System *Link*

- Built an adaptive signal system using **YOLOv8** and **ML models** to dynamically adjust traffic signal timings based on real-time lane vehicle density.
- Implemented **emergency vehicle prioritization** to automatically override signal cycles upon detecting ambulances or fire trucks using a fine-tuned YOLOv8 model.
- Developed a **Streamlit dashboard** for live monitoring, achieving **95.1% detection accuracy** and reducing vehicle wait times by up to **56.25%**.

Education

Anil Neerukonda Institute Of Technology And Sciences *Nov 2022 – April 2026*

B. Tech - Computer Science and Engineering(AI&ML) - **CGPA : 8.82**

Achievements

- Received **faculty appreciation** for my Tableau dashboard, which was showcased to students from another branch as an example of effective data visualization.
- **Ranked 7th** in a competitive **Machine Learning hackathon**, competing alongside senior students and demonstrating strong analytical and modeling skills.
- Solved 400+ LeetCode problems across various difficulty levels (easy, medium, hard).
