Karri Sai Krishna Naga Satish Reddy Leetcode Tableau Portfolio

Education

Anil Neerukonda Institute Of Technology And Sciences *Nov 2022 – April 2026*
B. Tech - Computer Science and Engineering(AI&ML) - **CGPA : 8.82**

Relevant Coursework

- Problem Solving
- Data Structures and Algorithms
- Object Oriented Programming

Experience

Associate Developer *Digno Solutions* *July 2026 - Present*

- Developed and maintained **backend services and REST APIs using Go (Golang)**, implementing business logic and scalable API workflows.
- Built, tested, and debugged APIs using **Postman**, while performing database queries, validation, and data analysis using **SQL and DBeaver**.
- Investigated and resolved backend issues, collaborated with the development team on feature enhancements, and followed **Git-based development and API testing practices**.

Full Stack Web Developer *Edumoon* *May 2024 – June 2024*

- **Developed and deployed responsive and dynamic web applications** using the MERN stack (React, Node.js, Express, MongoDB), resulting in a 25% improvement in user experience.
- **Designed and integrated robust RESTful APIs** while **optimizing application performance**.
- **Completed a hands-on internship** by contributing to real-world projects.

Projects

ML-Based Intelligent Traffic Signal System *Link*

- Built an adaptive signal system using **YOLOv8** and **ML models** to dynamically adjust traffic signal timings based on real-time lane vehicle density.
- Implemented **emergency vehicle prioritization** to automatically override signal cycles upon detecting ambulances or fire trucks using a fine-tuned YOLOv8 model.
- Developed a **Streamlit dashboard** for live monitoring, achieving **95.1% detection accuracy** and reducing vehicle wait times by up to **56.25%**.

Task Manager *Link*

- Developed a cross-platform Task Manager application using **Flutter** integrated with **Supabase**, implementing secure email-based authentication and user-specific data management.
- Designed and implemented full **CRUD functionality** for task operations (add, update, delete, and completion tracking), ensuring seamless user interaction and real-time data consistency.
- Built an interactive progress tracking system with **dynamic completion analytics**, including a circular progress indicator and profile-based insights for completed vs pending tasks.

Technical Skills

Programming Languages: Java, Python, JavaScript (ES6), SQL

Computer Science Fundamentals: DBMS, Operating Systems, Computer Networks, Problem Solving

Backend Development: Node.js, Express.js, RESTful APIs, JSON, HTTP, Client–Server Architecture

Frontend Development: React.js, JavaScript, HTML, CSS

Databases: MongoDB, PostgreSQL, MySQL, SQL, Database Design

Tools & Practices: Git, GitHub, Postman, Debugging, Agile Development, CI/CD Basics

Achievements

- Received **faculty appreciation** for my Tableau dashboard, which was showcased to students from another branch as an example of effective data visualization.
- **Ranked 7th** in a competitive **Machine Learning hackathon**, competing alongside senior students and demonstrating strong analytical and modeling skills.
- Solved 400+ LeetCode problems across various difficulty levels (easy, medium, hard).
